Russia Urges UN to Mandate Peace in Ukraine for Strikes

NEW YORK — Russia told the United Nations Security Council on Thursday to back a resolution in favor of a peace plan in Ukraine for the first time in three years, in an apparent bid to win influence over a country where it has a military presence.

Moscow is seeking to strengthen its military buildup on its eastern borders with the United States, and is preparing to deploy a battalion of long-range military equipment to the eastern European region, according to a report by the Associated Press. The resolution would need the approval of at least nine of the 15 members of the UN Security Council, including the five permanent members: the United States, Russia, China, Britain and France.

The resolution was drafted by Russia and China, according to a document obtained by the Associated Press. It calls on the Security Council to condemn and impose sanctions on the author of the resolution, which would be the first time Russia has publicly backed a resolution in support of Ukraine.
