E-ID Cards Essential, Very Important Issue: Abdullah

KARL - CEO Abdullah Ab- 
dril on Tuesday called on all 
Afghans to look to the fu- 
ture and embrace advances in 
the telecommunication sector 
and try using themselves as be- 
ing behind the times. In addition, Abdullah called on government to speed up 
the process of issuing Identity 
Cards so that the next elections 
will be less fraught with prob- 
lems. This would ensure more vot- 
ers than once, he said.

He said that electronic ID cards "are 
essential and that this is a very im- 
portant issue. "I hope that practical 
steps are taken very soon in this 
regard." Through the proper 
use of information technol- 
ogy we will be able to ensure smooth elections processes in 
future, he said. Addressing a press conference to mark

Exclusive Interview with Mr. Amin Ramin AWCC Managing Director

Regarding the Lunching of Latest HD Voice

Afghan Wireless Communications Company (AWCC) as Afghanistan’s first mobile operator continues to lead the way in mobile and broadband technology and now it has become Afghanistan’s leading “SMARTPHONE” service provider as well. In its endless pursuit to be bringing the newest technologies and features to its customers, AWCC launched the latest in voice clarity technology with the introduction of “HD Voice” service which is against its kind in Afghanistan. In this regard, the management of AWCC decided to have a talk with Mr. Amin Ramin AWCC Managing Director for further explanation and clarification of HD Voice services’ features and attract your attention to it.

Question 1: As it has been observed that, AWCC on the follow up of 
importing latest technologies, has taken the initiative of offering HD Voice technology; this time. So please give some more details in this regard?

Answer 1: HD Voice provides customers with the highest-quality, crys-
tal clear, crisp, unworn, more natural voice calls on mobile and fixed 
terminal networks. By using widescreen technology and further note

correlation feature enhancements on “SMARTPHONE” users experi-
ence greater clarity of voice, while also reduce background noises.

Question 2: Mr. Ramin, what is the major difference between 
newest HD Voice technology and old technology?

Answer 2: Simply we can say, it is similar to the difference between old 
style black and white television and now state of the art Color HD TV! It

is sharper, crisper, cleaner, lifelike, and infinitely more natural and cre-
ates a much more pleasurable experience.

Question 3: Mr. Ramin, please tell us the advantages and 
features of HD Voice technology for the customers?

Answer 3: HD Voice technology has many advantages and features for 
the customers that some of them are as below:

• HD Voice gives both caller and called party: the ability to speak softly 
and naturally not only in hearing, but also gives the ability of picking up 
and understanding of the tone intonations in speech. It creates an emo-
tional connection during the call.

• Natural sounding voice means instant recognition by caller of the other 
party.

With using this service you may have no more back 
ground noises or buzzing or clicking meaning no more interference makes calls that much better.

• If you are using this service, you may have no more broken connections and confused voices will become a thing of the past in any HD call.

• HD Voice is really golden when it is being used for the conference calls. An individual voices really stands out, making it easier for the group to know who is talking if there are multiple people in one call during a meeting or conference.

Questions 4: How an individual can use this HD Voice technology?

Answer 4: Both the caller and called party must be AWCC customers; as 
one of other Operators in Afghanistan than AWCC is now providing HD 
Voice services in the country. To enjoy HD voice, it requires both parties the caller 
and the called to a HD Voice-capable handsets.

Today there are over 300 various models of “SMART-
PHONE” which support HD Voice services. Basically, if your “SMARTPHONE” was made in the last 2 years

styles are; you means your handset has the ability of HD Voice service.

Question 5: Mr. Ramin, how do we know that we are in the 
HD voice service?

Answer 5: There is no chance of making mistake in recogni-
tion of HD Voice calls. Because, HD Voice in such crys-
tal clear sound with naturalness of background noise you will not notice immediately when you are on an HD Voice call. You would notice the difference if it just like the differ-
ence between old style radio and a new CD audio. It's obvious!

Question 6: Can we make an HD Voice call with someone 
who is not AWCC customer?

Answer 6: At this time HD Voice calls are only available 
between AWCC customers using HD Voice-capable de-
vices. So if the person you are calling either does not have a HD Voice capable handset or is on another network than your call will simply go through as it always did previ-
ously. It means, it will go with the same old style audio quality.

Question 7: Considering the above mentioned speci-
fications, what kind of position has it given to Afghan Wireless 
Operators?

Answer 7: With Afghan Wireless superior internet with

High-speed (IPv6), (QoS), (OCSP), (OpenGp), etc. The definitive International Mobile Op- erator Rating Agency now coupled with our vastly su-
perior Voice Quality by use of HD Voice services, make 
Afghan Wireless as Afghanistan’s premier “SMART-
PHONE” Telecomunications giant! No other Afghan Mobile Operators even comes close!
Kabul Blast Leaves 4 Dead, 40 Wounded

KABUL - At least four persons were killed and 40 wounded as a suicide blast occurred in the parking area of Ministry of Public Health in capital Kabul on Tuesday — a locality called Mangol where the Afghan government office is located. The explosion took place around 4:00pm local time.

Police officer and a passerby woman were killed and another 40 wounded, police said.

The government has condemned the act, denouncing the violence.

Mangol is in eastern area of Kabul city where health facilities are located.

The Increasing Number of Targeting Civilians

By Abdul Abad Bahrami

With the sharp rise in Taliban activities in recent months, the military government and other non-governmental organizations have been increasingly discussing the security of civilians in Afghanistan. As the situation becomes more dangerous, many civilians have been forced to flee their homes, and the Taliban have targeted innocent civilians in their attacks.

The situation is particularly dire in the provinces of Khost and Paktia, where the Taliban have been particularly active. The Taliban have been known to target civilians, including women and children, in their efforts to disrupt government operations and spread fear among the population.

In order to address this issue, the military government is working to increase security measures, including the deployment of additional security forces and the establishment of safe zones for civilians. However, it is clear that more needs to be done in order to protect the innocent civilians of Afghanistan. The government and international community must work together to ensure the safety and security of all Afghan citizens.

Adaption of Dual Strategies: Negotiation and Operation Works

By Anasatry

Many civilians are affected, not only by the parts of the world where it is a matter of being hit by natural disasters like earthquakes, floods, and hurricanes, but also by the elements of society like commercial disputes, social discord, and political turmoil.

The military government has been discussing the need for a comprehensive approach that addresses both the immediate needs of civilians and the underlying issues that contribute to their suffering. The government has also been working with local authorities and international partners to provide humanitarian aid and assistance to those in need.

In addition to these efforts, the military government is also working to strengthen its security forces and improve its capacity to respond to the needs of civilians. This includes the deployment of additional security personnel and the provision of training and equipment to ensure that they are able to effectively respond to threats.

The government is committed to protecting the rights and safety of its citizens, and it is working tirelessly to ensure that its efforts are effective and impactful. The military government and international community must continue to work together to ensure the safety and security of all Afghan citizens.

**Iran Can Become Major Producer of Nuclear Fuel**

Tehran: A voice of fear at the Atomic Energy Organization of Iran (AEOI) says the country is on the verge of becoming one of the most powerful producers of nuclear fuel, thanks to its new nuclear reactor.

A spokesman for the AEOI, speaking on condition of anonymity, said: "Iran has reached the stage of producing fast reactor. We have already started the construction of a new reactor that will be commissioned next year. This will enable us to produce high-quality fuel for nuclear power plants.

"We are also working on developing advanced nuclear technologies, which will allow us to produce more fuel in the future," he added.

AEOI's announcement comes as the US and its allies continue to pressure Iran over its nuclear program. The international community has called for Iran to halt its nuclear activities and enter into talks to resolve the crisis.

**Elsewhere in the World**

**US Approves Pakistan's Sacrifices against Terrorism**

Washington: President Bush has approved a request from Pakistan for $100 million in economic assistance to help the country's war on terrorism.

The move is part of a broader effort by the US to help countries affected by the war on terrorism. Pakistan has been a key ally in the war on terrorism, and the US has provided substantial aid to the country.

**China, Tajikistan to Deepen Counterterrorism Cooperation**

Beijing: China and Tajikistan have agreed to step up efforts in the joint campaign against terrorism.

Chinese Vice President Li Yuanchao and Tajik President Emomali Rahmon signed an agreement on further cooperation on counterterrorism during a meeting in Beijing.

The cooperation will focus on exchanging information and intelligence, and coordinating joint operations.

**Uzbekistan-ILO Siga MoU**

Tashkent: The International Labour Organization (ILO) and the government of Uzbekistan have signed a memorandum of understanding (MoU) to strengthen the fight against child labor.

The MoU will provide a framework for joint action to combat child labor, with a focus on the construction sector, where the problem is most acute.

**European Union Proposes New Military Action**

Brussels: The European Union has proposed a new military action to help countries in the region that are affected by the war on terrorism.

The action would involve providing training and equipment to support local forces in their fight against terrorism.

**Neighbours**

**Israel**

A report from Jerusalem says that the Israeli government is considering steps to ease the humanitarian situation in the Gaza Strip.

The government is working on a plan to allow more aid to enter the Gaza Strip, where thousands of people are in need of medical and humanitarian assistance.

**Pakistan**

A report from Islamabad says that the Pakistani government has arrested several suspected terrorists.

The arrests were made as part of a wider crackdown on terrorism in the country, following intelligence reports of a possible attack.

**Georgia**

A report from Tbilisi says that the Georgian government is considering lifting the state of emergency.

The state of emergency, which was implemented in response to the August 2008 war with Russia, has caused widespread disruption and hardship.

**Lebanon**

A report from Beirut says that the Lebanese government is considering a new security law.

The law would provide for increased police powers and the creation of a national security agency.

**Syria**

A report from Damascus says that the Syrian government has agreed to allow international monitors to enter the country.

The monitors will be tasked with assessing the situation in areas of conflict and providing information to the international community.

**Syria**

A report from Damascus says that the Syrian government has agreed to allow international monitors to enter the country.

The monitors will be tasked with assessing the situation in areas of conflict and providing information to the international community.

**US**

A report from Washington says that the US government is considering a new strategy to combat the war on terrorism.

The strategy would involve a combination of military action, diplomatic efforts, and economic sanctions.

**Israel**

A report from Jerusalem says that the Israeli government is considering steps to ease the humanitarian situation in the Gaza Strip.

The government is working on a plan to allow more aid to enter the Gaza Strip, where thousands of people are in need of medical and humanitarian assistance.

Four-Day Domestic Product Expo Opens in Herat

KARUL - A four-day domestic product expo opened in Herat on Tuesday with 65 local companies participating.

The expo - all from the Herat industrial zone - showcased 50 stalls at the expo.

At the opening of the event, Heart governor Mohammad Arifullah Refai expressed confidence in the government on helping the local private sector.

He said the government was willing to assist the private sector in any way possible.

"We have taken the necessary steps to run competitive products. For this purpose, we are running all government institutions to use domestic products," Refai said.
