Parliamentary Elections a Serious Challenge for the Government

The convention to Ghani and CEO Abdullah Abdullah's Over 4000 Hindus and Sikhs Granted Indian Citizenship

NEW DELHI - Over the past one year, the Narendra Modi-led government has granted Indian citizenship to over 4,200 Hindus and Sikhs from Pakistan and Afghanistan - which is nearly four times the number of the previous year. Figures at the end of April 2015 showed that the HP government approved citizenship for 3,126 Hindus and Sikhs from the two countries who have sought refuge in India. This was in stark contrast to the 1,251 granted by the Congress-led UPA in 2014. HP had declared its aim of positioning itself as a refuge for Hindus fleeing persecution anywhere in the world and the increase in the grants seen to fall in line with their aim.

As in election motions for the 2014 Lok Sabha elections, the BJP had declared India as a "natural home for persecuted Hindus" who "shall be welcome to seek refuge." The number of thousands of persecuted citizens are minimal when compared to the country's large population. Government has taken a call involve Indian asylum being faced by people of Indian origin in other countries but not anyway to stay in the country for long, so is now asking the country.

Element that Strengthen Democracy!

By Asmatyar

The free exercise of rights to choose a legislative body, one's (the) choice to be freely and robustly communicated to the government through elected representatives is the hallmark of democracy. From time immemorial, democracy has been a government structure that seeks to regulate and ensure the participation of citizens in the government's decision-making processes. It is a system that values the consent of the governed and the freedom of expression. The government plays a crucial role in the democratic process, and it is often required to take decisive actions that are in the best interest of its citizens. This is why the government must be held accountable for its actions.

Taliban's recent actions in Afghanistan have raised concerns about the stability of the government and the rule of law. The government's failure to provide security for its citizens has led to a loss of trust and confidence in the government. There is a growing sense of frustration and anger among the Afghan people, who feel that their voices are not being heard and that their rights are not being protected.
