Imperiled Human Lives!

By: Asnayati

August 05, 2015

The Empty Promises of Prosperity

It is unfortunate to note that we, human beings, have now learnt to treat the environment and the earth, and the instability and chaos that has now faced our address. It is, however, important for us to understand the consequences of our actions. We are killing the human race, one of the things that is obvious in this world.

For those who see reality on earth a dump of soil from any garden. It is green, it is beautiful, and it seems that it remains the same for thousands of years. It is like a piece of the earth that is taken over by a few. This is because the human race is in a race to destroy the world.

The major world power is Afghanistan, suffering from decades of bloody conflict in its dire and clear need for reformation and stabilization of human dignity and respect.

In order to avoid the law of nature, the human race must strike the UN, the Pakistan, and the Islamic rule. The report states that 2,000 civilians are being killed in the bloody conflict in the first six months of the year, while 3,000 people are injured. It is not only the civilians who are being killed, but also the displaced people who are also being killed and maimed by all kind of violence.

The report also noted the amount of casualties caused by arson and burning of civilians in general and aid workers, as a result of terrorist attacks. The report attributed the causes of the casualties to the war, the ethnic cleansing of civilians, and the burning of aid agencies in the country.

In the current situation, the only solution is to end the war and bring peace to the region. The people of Afghanistan are suffering from the war and the instability caused by the conflict. The war has caused the loss of lives, displacement of people, and destruction of property.

The report concludes that the war has caused significant loss of lives and property. The report also notes that the war has caused the loss of human dignity and respect.

Benefits of Afghanistan’s Accession to the WTO

By Waliullah Zadran

Afghanistan, a land-developed country and landlocked economy, is considered the 6th poorest country in the world. As stated by WTO (2019), Afghanistan has currently obtained a status of observer in the General Agreement on Tariffs and Trade (GATT). The country has also been invited to become a member of the WTO.

The WTO is a global body that aims to promote free trade and reduce barriers to trade between countries. Afghanistan’s accession to the WTO could bring several benefits, including improved access to international markets, increased trade, and economic growth.

Firstly, membership in the WTO could provide Afghanistan with easier access to international markets and increased trade. Afghanistan could benefit from increased market access, particularly in services, which account for a significant portion of the country’s economy. Afghanistan’s accession to the WTO could also lead to increased foreign direct investment, which is crucial for economic growth.

Secondly, accession to the WTO could contribute to poverty reduction and human development. Afghanistan has a population of around 33 million, with a population growth rate of 2.7% per year. The country faces significant challenges, including poverty, unemployment, and limited access to education and healthcare. Accession to the WTO could contribute to poverty reduction by increasing trade and economic growth, which could lead to increased government revenues and reduced poverty.

In conclusion, Afghanistan’s accession to the WTO could bring significant benefits to the country, including improved access to international markets, increased trade, and economic growth. However, it is important to note that accession to the WTO is a complex process, and Afghanistan will need to make significant efforts to fulfill the requirements and obligations of membership.
