Responsibilities are Unavoidable

It is now considered a truth that human nature tries to avoid the negative consequences both consciously and as the result of the unconscious mind, where the psychological impact of the future and fate is decided by the consequences from the early childhood by our parents. We are all conscious from early life. We tend to like and hold to the positive impacts of action instead of negative ones, and actually, we are all responsible for all the consequences of action that we take. While we cry for our rights and enjoy while receiving them, why don't we realize that we don't need to produce more than what we consume?

The famous writer Nishan Chemsky says, "Responsibility is believing in yourself, working to the best of your ability, at the same time being accountable for your own actions."

How does it work that when a businessman enjoys the profit in good days and is in debt in bad days also because we don't think of the responsible for all the decisions that he has made the company to join, then what on earth has happened to our society, especially the politicians that they do not admit their mistakes, and often blaming? Why has this society been raised in terms of responsibility? Every single man in the society becomes a responsible citizen when the wrongdoings are brought to the forefront of the public.

It can be observed in our society that mostly the children are not socialized in the right way and the parents do not seem to realize what their responsibilities are towards their fellow human beings and towards society. Mostly, they are taught to fulfill certain responsibilities which are limited to their individual lives. They do not seem to realize how they fit within a society and what their responsibilities are towards the others.

Another observation is that mostly people expect the society to fulfill their responsibilities. But they do not realize that they can easily be fulfilled by the others. When they are asked to set examples for others by performing their responsibilities without any obligation, they always try to find the reasons and do not fulfill their responsibilities. This is understandable because they can be easily differentiated as more prosperous and developed.

It is important to remember that rights bring responsibility, and the responsibility makes you accountable and accountable to society. This balance will keep the society going. And we should never underestimate the responsibility that the others have towards us. It means that if we want to live in a society, we should keep the balance and treat others with respect.

It is a simple thing that we all should consider. If we want to live in a society, we should keep the balance and treat others with respect. This balance will keep the society going.
