Russia to Keep Sending Free Weapons to ANSF: Matvienko

MOGADISHU - Russia's upper house speaker Valentina Matvienko on Tuesday said Moscow will continue supplying free weapons to the Afghan National Security Forces (ANSF) to help fight the Islamic State (IS)insurgent group. In early October, First Vice President Abdul Rashid Dostum asked Russia for military aid amid a fight against militants operating in the country.

"We will continue the work on the organization of gratuitous supply of arms and ammunition to Afghanistan. We want to accelerate the commitment of the Afghan government to modernize the country's air force," Matvienko said at the meeting with Faizal Hashim, the speaker of the upper house of the Afghan Parliament.

According to the Russian law, arms delivery is currently translating to commercial Russian main supplier for the purchase of these military helicopters. Ms. Mariussen stated that Russia is concerned over growing Islamic State (ISIL) influence in Afghanistan.

"We are concerned by the influence of ISIL in Afghanistan and its intentions to abstain from the Taliban," Matvienko said as . . . (More on Page 2)

Insecurity is Supporting Human Smuggling

As there have been insecurity, poverty and discriminations in different parts of world, different types of human smuggling have been identified. Among them one of the most dominating one emerging from the countries with insecurity, disorder and poverty.

Human smuggling takes place when the person being smuggled gains any sort of agreement with the smugglers in return for money to be smuggled to the desired country. The agreement is basically decided on a particular amount of money that has to be paid by the customer to the smuggler after reaching, to the destination. In most of the cases however, the customer has to pay the money in advance, which he has no other option. This creates a sort of problem as well as a reason for the customers to trust the smugglers.

Insecurity is a complex phenomenon and it involves different individuals and some types. The whole process actually involves individuals and groups as various players at different levels that takes place in different forms and through different channels. The techniques used by different individuals and groups differ from one another and they use different methods to achieve their goals. The borders are one of the most dominating facts about human smuggling, that is it includes the risk of life. The illegal ways that are adopted through the process include very risky attempts within which the people can easily get lost. The border policies of some countries can even shoot the people who try to cross those borders illegally. However, the facts show that people consider this much more than the lives they are having in their own countries. People are willing to accept illegal risks.

Human smuggling is a threat in the countries where the standard of living is not satisfied and people suffer. Because if lack of economic facilities or they are threatened by instability that has even jeopardized their lives. Feeling threatened or life threatened by danger, they give up the right of their future to someone when they are not even known. They just want to escape from the poverty and war.

The other main thing in their dreams is better life, which may not be fulfilled at all but they may easily feel the part of the ones who are living in the third world.

Human smuggling is a complex problem of some parts of the world. With the goals of an individual in human smuggling have evolved to a complex and some others are continuing. The smugglers, who are used by smugglers have practically institutionalized; for instance, Mexico and rural Central America, a state from the United States, from West Africa, throughout South America and some parts of South East Asia. Accumulation of criminal logics, the weak societies and the corruption in the countries where smuggling is not controlled, are responsible for the flourishing business of human smuggling.

Afghanistan is a country that has been the victim of this evil. The disintegration of the war and poverty, and insecurity has enveloped the people in their motherland and run towards any country where they can find a better life. The series of civil wars and religious litanies have made the life miserable for most of the people and many have migrated from their homeland to other countries because they have opted for being smuggled. Since the downfall of Taliban the circumstances are correct in country and it is believed that the people who withdraw from the border with international forces and return to the place of origin. Taliban have made security a big challenge for the Afghan National Security Forces in different parts of the country. There are certain attainments that are now under control of Taliban. Civilian people have been suffering much from this ignorance as they are mainly the victims. At the same time, other threatening smuggling groups that are multiplying these crimes are emerging in different parts of country. Taliban is the most dominant among them and is nehmmered by the continuous killing of the poor and innocent people.

People are able to taste the meaning of their lives by leaving the country and human smuggling has come to the scene to rescue them. The number of human smuggling has gradually increased and also the means that are used too much has been increased. Human smuggling has acquired illegal measures. At the same time Afghanistan government must take strict measures to control the export and import of people. For this reason, it becomes important to control the human smuggling to use the legal and social political and social circumstances so that they do not favor this type of activity.
