We must
Pursue Peace

A
There have been inconveniences, privacy, and discriminations in different parts of the world, there have been different types of social problems as well. Facing them one of the most dominating one-remaining-from-the-counterparts with an invincibility, disorder and poverty is human smuggling. Human smuggling takes place when the person being smuggled gets into an agreement with the smuggler and gives his consent to be smuggled to the desired country. The agreement is basically defined on a particular amount of money that has to be paid by the consent to the smuggler after reaching the desired point. In most of the cases, however, the customer pays the money afterwards or fails to pay them. This creates a sort of problem as well as he cannot get his money back from the smuggler if he is not taken to his destination.

Human smuggling is a complex phenomenon and it involves different individuals in different countries. It is not limited to certain places and it includes both legal and illegal means crossing the borders. One of the most disturbing facts about human smuggling is that in the risk of life. The illegal ways that are adapted through the borders within which people can easily lose their lives. The border transit points or routes in different countries can even be the cause of death to the people who try to cross the border illegally. However, the facts itself indicate that the lives of such people are not as important as the lives of the ones who are involved.

Human smuggling is mostly a trend in the countries where the border crossing of a life is not satisfactory and people suffer because of lack of economic facilities or they are threatened by instability that has even jeopardized their lives. Feeling disillusioned for the fear of life or threatened by danger, they agree to give the rights of their lives to someone whom they may not even expect to get their that they even pay. What they only have in their minds is to escape. Hence, they may not be fulfilled at all but merely fall into the pit of the one who is taking them to another country.

Human smuggling has been happening in different part of the world.

With the growth of suitability, human smuggling has evolved into a sophisticated service industry. And certain crimes are now committed by smugglers to evade the national and regional laws and regulations towards the countries where they can find their desired peaceful environment. Various organizations have made the life miserable for the most of the people and made them into slaves. Such organizations have been in operation for many years while being hired for being smuggled. Since the downfall of Taliban in the Western Europe, Afghanistan, Pakistan, and the Middle East have been facing the misconception in the national and international sense. The security is a big challenge for the Afghan National Security Forces in general and the police in particular. The Afghan police are now under the control of Taliban. Civilians have been suffering much from this growth of insecurity as they are mainly the victims. At the same time, other threatening militant groups that are multiplying insecurity are also emerging in the region. Thus, the interest of the mafia and armed smugglers is increasing rapidly, and this is the main reason for the growth of human smuggling. People are thinking of securing their lives by being conveyed to the country and putting in the hands of the smugglers, as there are no threats to their security.

The number of human smugglers has risen in Kabul where they are making good money by promoting the people. Using their social status and networks, they are collecting and remitting money to the people. According to certain estimates, they charge about $3,500 to take them in the risk or in the security, creating massive inconvenience and the custom to escape these people. At the same time, the lives of the people are becoming more and more difficult, and the result is that the number of people seeking human smuggling has increased.

Human smuggling is a very serious crime and all the ways that are used for the sake of avoiding punishment and the desire to migrate, the people of Afghanistan have been suffering. At the same time, the number of American people who are coming to Afghanistan is increasing. For example, they are coming to Afghanistan to avoid the war in their own countries, and they are coming to Afghanistan to try to get a better life in the country. At the same time, the number of people who are coming to Afghanistan is increasing for the sake of better life is also increasing.

The data published by United Nations Organization reflects how violent practices supported by high-deduct of illegal trade are causing suffering against women and children. The use of women and children for illegal trade purposes results in the economic form of physical and sexual violence in their lives. In order to protect Afghan women and children from the violence, Ministries of Women, Children and Family Affairs, and the Ministry of Interior are working on the prevention of domestic violence, and compliance with children's rights.

Every day, children are facing violence on the playground, playgrounds, restaurants, shopping malls, and, as mentioned, mere assault and sexual assaults are reported where people are living and going out to flee from federal violence, threats, and fear of violence. The situation is getting worse, and the safety of children is a big concern. People are losing their families, and they are forced to leave their children in the danger zone.

Violence against women in Afghanistan is a big problem for women. There are many reports that women are facing violence from their family members or neighbors. Women's rights have not been well respected and they are not facing any problems in the country.
